

Bringing responsibly sourced, organic dates from Mediterranean region directly to you.

Who We Are

Alya Foods specializes in the importation of dates from Algeria. We work directly at the source with local farmers to grow the highest quality dates with a beautiful translucent blonde color and caramel-like flavor. Our dates are organic and handpicked by our farmers in Algeria where the environment is rich with sunlight and abundant in clean underground water. We are dedicated to ensuring that our dates meet high standards of quality, safety, and traceability.

"We are proud to work closely with date farmers in Algeria to bring organic, wholesome, nutritious dates to local distributors all over the world. We value quality, and our mission is to uphold high standards in the foods we import."

-Mokhtar Kenioua, Manager at Alya Foods

Our Products

Deglet Noor Dates, Imported from Algeria.

Deglet Noor dates are harvested from oasis palm trees using a refreshing rinse. They meet high standards of quality and adhere to British Retail Consortium (BRC) and International Featured Standards (IFS). In addition to whole dates, Alya Foods also offers diced dates, date powder, date paste, and date syrup.

Algeria is one of the highest producers of **high quality** Deglet Noor dates

They can be served fresh and eaten as a snack or incorporated into salads, cereals, and desserts.

Our sun-ripened dates are high in nutrients, particularly potassium, calcium, and fiber. They are also packed with carbohydrates, including sucrose, fructose, and glucose, making dates a quick and natural source of energy.

Alya Deglet Noor dates will retain their flavor and nutritional value for up to a year when refrigerated; and even longer if frozen.

Alya Foods delivers to distributors, supermarkets, packers, and manufacturers.
